

2021 CHICAGO MARATHON – TESTING GUIDANCE

In accordance with City of Chicago guidance, full COVID-19 vaccination or negative COVID-19 test results will be required to participate in the 2021 Bank of America Chicago Marathon and to attend the Abbott Health & Fitness Expo. For registered participants or Expo attendees who are not fully vaccinated, a negative COVID-19 test result must be obtained no more than 72 hours before participation in either event.

When to get tested

For participants who are not fully vaccinated, you must get tested and have a negative result no more than 72 hours prior to attendance.

What type of test result do you need?

The test must be a COVID-19 viral test (nucleic acid amplification test [NAAT] or antigen test) with Emergency Use Authorization (EUA) from the U.S. Food and Drug Administration (FDA). Self-tests (sometimes referred to as home test) and rapid tests are acceptable as long as they are FDA-EUA approved viral tests and are accompanied by written documentation of results.

Electronic or printed evidence of negative test results must include:

- Type of test
- Entity issuing the result (e.g., healthcare entity, laboratory, manufacturer)
- Specimen collection date
- Information that identifies the person tested: full name and date of birth

Test kits are not acceptable evidence of negative results.

Test result documentation with the information above must be electronic or printed.

Where to get tested

The best way to get tested is by calling your healthcare provider or conveniently ordering self-administered at-home tests. COVID-19 testing is also offered in many pharmacies and healthcare centers. Nearby testing locations are on the back of this flyer.
